Summary

I'm an undergraduate in CSE with a knack for turning complex problems into elegant solutions. My coding journey has been filled with excitement and a constant thirst for learning. Beyond the realm of code, I'm an explorer at heart. Traveling fuels my creativity and broadens my problem-solving horizons. I embrace diverse cultures, absorbing inspiration from every corner of the globe.

Experience

WordPress Developer • Ahaarveda   **Jun 2021 - Feb 2023**

I was an intern at Ahaarveda and my responsibilities were-

- Worked as an intern at Ahaarveda, actively contributing to the development and maintenance of their website built on WordPress.
- Implemented various functionalities and enhancements to improve user experience and website performance.
- Collaborated with the team to debug and resolve issues, ensuring smooth functioning of the website.
- Conducted thorough testing and quality assurance checks to ensure high-quality deliverables.
- Assisted in content creation and management, optimizing website content for search engines.

Education

Bachelor of Computer Application • The Study Hall College   **Nov 2020 - Nov 2023**

Computer Science • Grade: 75%

My Bachelor of Computer Application degree provided me with a strong foundation in computer science and equipped me with the necessary technical expertise to excel in this dynamic field. Through my academic achievements and practical experiences, I have developed a comprehensive skill set that encompasses software development, problem-solving, and effective communication.

Projects

Educational Website   **Sep 2023 - Nov 2023**

- Developed a project educational website offering users personalized information on available colleges based on their marks
- Implemented functionality for users to receive real-time updates on exam schedules, exam form openings, and news related to popular exams such as NEET and government exams, including vacancy information
- Designed a comprehensive courses page to assist users in preparing for exams
- Curated a list of top colleges based on criteria such as low fees, location, and atmosphere

Twitter Clone   **Mar 2023 - May 2023**

- Developed a feature-rich Twitter Clone application with all the functionalities and features of the original Twitter platform.
- Implemented user authentication and registration system to ensure secure access and privacy.
- Created a user-friendly interface with attractive UI/UX design, allowing users to easily navigate and interact with the platform.
- Successfully incorporated real-time updates and notifications, enhancing the user experience and engagement.
- Designed and implemented a robust messaging system, enabling users to communicate with each other privately.
- Integrated a powerful search functionality, allowing users to find specific posts, users, and trending topics.

Real Time Weather Info   **Feb 2023 - Mar 2023**

- Developed and implemented a real-time weather information website to provide users with up-to-date weather updates for any location globally.
- Designed and executed an intuitive user interface for seamless navigation and accessibility.
- Incorporated advanced data retrieval techniques to ensure accurate and reliable weather forecasts.

Skills

Next.Js, Redux toolkit, Express.Js, HTML,CSS,Javscript, Tailwindcss, ReactJs, Rest api, WordPress
